Work Experience

Flutter Developer

Folkslogic Technologies

08/2024 – present | Mangalore, India

- **Led a team of 4 developers**, managing project tasks and ensuring timely app releases on **Play Store** and **App Store**.
- Integrated **location-based services** and real-time tracking with API management for live updates and task assignments.
- Implemented **real-time data transfer** using **WebSockets**, ensuring seamless live data synchronisation across various components.
- Worked on **local and remote storage solutions** and managed offline capabilities to improve app performance.
- Developed complex features such as **audio players**, **notifications** (in-app and remote), **AR**, and **Google Maps integration**, enhancing user interaction.
- Implemented testing strategies, including **unit**, **widget**, and **integration testing**, to ensure functional reliability across various devices.
- Contributed to app **internationalisation**, implementing multi-language support and localisation for global usability.
- Developed and integrated **RESTful APIs using Node.js** for efficient backend data handling, secure data transfers using **JSON** and **AWS private servers**, and real-time synchronisation with external services.

Flutter Developer

Friggitello Automation LLP

06/2022 – 08/2024 | Kochi, India (Remote)

- Developed and optimised **complex UI components** using Custom Clippers and Transformers to create interactive and dynamic designs.
- Utilised **BloC & RxDart** for structured state management, ensuring **scalability and maintainability**.
- Worked on **Clean Architecture and MVVM Patterns** to improve modularity and testability.
- Implemented **secure authentication flows**, including multi-role access control using **Firebase & Supabase**, ensuring robust security and data integrity.
- Collaborated in **Scrum-driven teams**, leveraging **Jira** for sprint management, **Bitbucket/Git** for version control, and **CI/CD pipelines** for faster feature releases.
- Utilised **Flutter DevTools** for **real-time performance profiling**, **widget tree tracking**, and **memory analysis** to optimise app efficiency.
- Conducted **in-depth debugging and error handling** of different APIs using **Postman**, ensuring application stability and smooth data transactions.

Skills

Programming Languages :

- Flutter, Dart, Kotlin, Node.js, Swift, Figma, C, Python.

State Management :

- BLoC, RxDart, Provider, Riverpod.

Data Persistence :

- Firebase Storage, Hive, Shared Preferences.

API Integration :

- Postman, REST APIs, third-party plugins.

Architecture :

- Clean Architecture, Flutter MVVM.

Version Control :

- Git, Gitlab, Bitbucket.

Project Management :

- Jira, Redmine, Trello.

UI/UX Design :

- Strong understanding of design principles, frontend development.

Operating systems :

- Windows, Mac.

Projects

MBR Holy Quran

Religious Application

- Led a team of 4 developers, assigned task and conducted code reviews.
- Implemented data persistence using Hive and Firebase Remote Config.
- Developed location services for prayer time and Qibla direction.
- Ensured smooth integration of various features for a seamless user experience.

Pepper Train

E - commerce Application

- Implemented user authentication via third-party logins, email, and OTP.
- Developed the entire cart system, including coupon codes and wish-list.
- Integrated notification services to enhance user engagement.
- Gained foundational knowledge of payment method implementations.

E Tender

Contractor management Application

- Developed employee management system, including admin login authentication.
- Implemented attendance management and salary structure generation.
- Automated PDF generation for contracts and salary details.
- Managed notifications for contract updates and project deadlines.

Paarsel Logistics

Courier Application

- Designed and developed the entire UI for the application.
- Implemented live package tracking using unique package identification codes.
- Created various dynamic forms to facilitate order processing.
- Ensured seamless user experience across Android and iOS devices and web browsers.

Flamingo

Document reader Application

- Led development and guided a junior developer.
- Built features for opening, generating, and editing PDF / Word files.
- Implemented a system to track and re-open last accessed documents.
- Developed a PDF-to-Word file conversion feature.

Cric8

Scorecard Application

- Developed entire UI for Cric8 Application.
- Implemented live data exchange using WebSockets.
- Integrated essential features for an engaging user experience.
- Collaborated with the team to refine app functionality.

Connct App

Digital Business Card Application

- Developed the UI and created various user input forms.
- Implemented secure data transactions for seamless information exchange.
- Ensured compliance with user consent for data sharing.
- Optimised app performance for a smooth networking experience.

Hydromaps

Private App for Dubai Government A water resource management application for government officials.

- Sole developer responsible for UI development.
- Worked with Firebase Realtime Database for continuous data reading.
- Ensured smooth, responsive UI/UX for government officials.
- Coordinated with the backend team for optimal data structuring.

Education

P A College Of Engineering

Bachelor of Engineering

09/2018 – 06/2022

Mangalore, India

Certificates

Mobile App Development Capstone Project

by Richa Arora

Flutter - Advanced Course

by Bryan Cairns
